Summary

Software Engineering student with 3+ years of experience specializing in Flutter mobile development and full-stack systems. Seeking an end of studies internship in mobile or web application development.

Technical Skills

Mobile Development: Flutter/Dart, Android SDK, iOS Development, React Native, Cross-Platform Deployment

Backend & APIs: NestJS, Express.js, Django, REST APIs, gRPC, GraphQL, JWT/OAuth2, Microservices

Programming Languages: Dart, JavaScript/TypeScript, Python, Rust, C, SQL

Real-Time & Messaging: Kafka, WebSockets, Firebase Cloud Messaging (FCM), Socket.io, Event-Driven Architecture

Databases: MongoDB, PostgreSQL, MySQL, Redis, Firebase Firestore

DevOps & Tools: Docker, GitHub Actions, CI/CD Pipelines, Linux, Git, Postman, VS Code

Security & Compliance: Authentication/Authorization, Data Encryption, API Security, GDPR Best Practices

Certifications

- Certiport IT Specialist in Java Programming
- Certiport IT Specialist in Python Programming

Experience

Full Stack Developer, Freshk December 2024 – Present

- Led Flutter app development for B2B produce distribution platform
- Developed Django REST APIs with JWT authentication and Next.js admin dashboard
- Optimized CI/CD pipelines with Docker and GitHub Actions, reducing deployment costs by 70%

Front-end Developer Intern, Finlogik June 2024 – July 2024

- Built cross-platform desktop application for real-time financial monitoring using Electron and React
- Integrated Kafka.js for high-throughput data streaming and event synchronization
- Implemented performance optimizations with virtualized tables and Zustand state management

Full Stack Web Developer Intern, Whitecape Technologies June 2024 – Aug 2024

- Built full-stack web applications using React.js and Rust (Rocket.rs)
- Designed RESTful APIs with authentication and caching strategies
- Collaborated in agile team to deliver production-ready features

Projects

E-Commerce Platform with Microservices Architecture github.com/TBG101

- Designed distributed microservices system with GraphQL API Gateway, gRPC inter-service communication, and Kafka messaging
- Implemented independent services (User, Product, Order, Logging) with WebSocket-based real-time monitoring dashboard
- Built responsive React/TypeScript frontend using Apollo Client for GraphQL queries and optimistic UI updates
- Orchestrated deployment with Docker Compose managing MongoDB clusters, Kafka brokers, and service containers

Cross-Platform Remote Control System

github.com/TBG101

- Developed secure remote desktop control system using Flutter (Android) and Rust (Windows service)
- Implemented local network communication for remote command execution and PC management

Android Music Player with YouTube Integration

github.com/TBG101

- Built a Flutter mobile media player with local MP3 playback and YouTube audio download functionality
- Implemented background service for uninterrupted playback and custom notification controls

Interactive 3D Portfolio Website

zied-harzallah.tech

- Created immersive portfolio using Three.js and React with custom 3D animations and interactive elements

Bilingual E-Commerce Fashion Store

github.com/TBG101

- Created full-stack Next.js/React e-commerce site with bilingual support, admin dashboard, and MongoDB backend
- Implemented authentication, analytics and order management.

Education

Ecole Polytechnique Sousse, Software Engineering Diploma (Expected)

June 2025

- Specialized in software architecture, mobile development, and distributed systems

Lycee Sahloul 4, High School Diploma

July 2021

- Completed scientific baccalaureate

Languages

Arabic: Native **English:** Advanced **French:** Intermediate
